

Nathan Iverson, P.E.

Iverson is a Professional Engineer and Vice President of Foundations at Veit. He has more than two decades of experience designing and implementing specialized foundation systems and shoring solutions. Known for his innovative and cost-effective strategies, he excels in addressing complex challenges related to soft soils, rock, slope stabilization, and existing utilities/structures. He received his bachelor's degree in civil engineering and master's degree in geotechnical engineering from the University of Minnesota.
