

Jeff Segar, P.E., S.E.

Since starting his career in 1998, Mr. Segar has been the Engineer of Record and responsible for project related design and production of construction documents for many structures built using steel, concrete, masonry, geogrid fabrics and timber construction. He provides structural engineering services for support of excavation, soil nail slope stabilization, construction load shoring, falsework and demolition. Mr. Segar is the national Co-Chair of the Joint ADSC-IAFD and DFI Anchored Earth Retention Committee.
