Join industry professionals at DFI S3: Slopes, Support and Stabilization, a 2.5-day conference that brings together industry professionals to explore **deep foundation** and **ground improvement solutions** for:

- Stabilizing soft ground, landslides and slopes
- Supporting deep excavations
- Advancing geotechnical innovation through research, case studies and technology

Event Highlights

- **Panel Discussion: Measurement While Drilling** – Gain insights into real-time drilling data collection.
- **DFI Risk and Contracts Committee Panel** – Learn about the “Benefits and Risks of Various Project and Contract Structures in Construction.”
- **Welcome Reception in the Exhibit Hall** – Connect with fellow professionals and explore industry innovations.
- **Cheers to 50 Years Reception** – Join us as we celebrate DFI’s 50th anniversary and its contributions to the industry!*

**Please note that this is a ticketed event and a portion of the proceeds benefit the DFI Educational Trust Women in Deep Foundations Fund.*

Join us in Wisconsin!
