

Jeff Burton, P.Eng

Jeff is the Information Systems & Research Manager at Advanced Construction Techniques (ACT) in Ontario, Canada. Jeff has over 23 years of experience designing, programming, deploying and maintaining innovative data management systems for the geotechnical construction industry. Mr. Burton has deployed systems on 20+ projects including Rough River Dam, Clearwater Dam and Sir Adam Beck Reservoir. Currently, he is the Vice Chair of the DFI Information Management Systems committee.

Jeff has published papers for the DFI's Grouting Conference, including "Immersive 3-Dimensional User Interface for Grout Monitoring Systems" and "Enhanced Alarms to Improve Real-Time Response in Grout Monitoring Systems". He completed his Bachelors of Applied Science in Engineering from the University of Waterloo with a specialization in Process Control Systems.
