# GEOTECHNICS REIMAGINED

International Conference on Deep Foundations and Ground Improvement

## Special Interactive Exhibition Area

We are planning a special interactive exhibition area for young professionals and students to learn about our industry and find out how they can enter the industry and thrive in a technologically advanced career at the forefront of the fight against climate change.

## Join us for a one-of-a-kind conference, covering these topics:

- **Broadening the Scope of Usual Ground Engineering Techniques**  
Explore innovative applications beyond the conventional methods.
- **Embracing Sustainability**  
Focus on reducing CO2 emissions in foundation design and execution.
- **Encompassing the Human Living Environment**  
Incorporate human-centric designs in ground engineering.
- **Minimizing Impact in Sensitive Areas**  
Address foundation work challenges in urban and natural environments.
- **Recognizing Digitalization's Impact**  
Integrate digital advancements in foundation design and execution.
- **Reinventing Business and Contractual Practices**  
Transform business models, procurement methods, and workforce culture.
- **Reusing and Strengthening Existing Foundations**  
Evaluate and integrate old and new foundation structures.
- **Risk Sharing in New Sustainable Foundation Concepts**  
Address conflicts with existing codes and develop new sustainable concepts.

## Why Attend?

- Engage with industry leaders and experts
- Discover cutting-edge research and innovations
- Network with professionals from around the globe
- Gain insights into sustainable and digital practices in geotechnics
- Participate in an interactive exhibition for aspiring young professionals

JOIN US  
**MAY 21-23**  
**2025**  
BRUGES, BELGIUM
