

## **Denny Capps, Ph.D.**

Denny Capps is the National Terrestrial Geomorphologist for the Geologic Resources Division of the National Park Service. Before that he was Denali National Park's geologist for 13 years. In his current role, Denny leads the NPS Geohazards Program, co-manages the Unstable Slope Management Program with the Federal Highways Administration, is a member of the Interagency Coordinating Committee on Landslide Hazards, and is a Bureau Investment Review Board advisor for geohazards. While at Denali he led the NPS's geologic research on the Pretty Rocks landslide and other geohazards.
