

Jeff Martin, P.E., PMP

Jeff Martin is the Program Manager for Denver Water's Gross Reservoir Expansion Project. Martin is focused on collaborative development of water infrastructure that creates long-term water supply solutions while balancing environmental and social impacts.

Martin is an industry leader in program management and alternative delivery methods for the execution of large-scale water development projects. He has been with Denver Water for the last fifteen years and is the Program Manager for the Gross Reservoir Expansion Project, which will help Denver Water increase water collection system resiliency and balance while providing environmental benefits for the state.

He earned his undergraduate degree in Civil Engineering at the University of Colorado Boulder (1999), received a Master's degree in Management at CU-Denver's Business School (2016), is certified as a Program Management Professional, and an innovation leader in CM/GC project delivery.
