

Conrad Ginther, P.E.

Mr. Conrad Ginther is a Principal Engineer focused on design and implementation of specialty geotechnical construction including post tensioned anchors, drilling and grouting, cutoff walls, and composite barriers and is experienced in the design and construction of gravity concrete dams and their appurtenances. He has extensive experience with best practices in dam safety and has participated in numerous dam safety inspections, PFMAs, and SQRA's for projects regulated by the FERC, USACE, TVA, and other federal and state agencies. Mr. Ginther has experience as an engineering consultant, contractor, and owner's representative on high profile projects in the United States and internationally.
