

## **James Marsland**

Jim has been with GZA for his entire career; he started as an intern while pursuing his B.S. in Civil Engineering from the University of Rhode Island (URI). After completing his undergraduate degree, Jim joined the Providence office full-time and earned an M.S. in Civil Engineering from URI. As part of the geotechnical team, Jim is experienced in multiple foundation types, ground improvement and marine facilities/bulkhead design. His specialty in working in Offshore Wind industry (OSW) has been instrumental in driving that work within GZA. He works with a variety of client types, including engineers, architects, and contractors. Jim is a registered Professional Engineer in multiple states.
