

Bob Group, P.E.

Bob Group, has been working in the engineering geology industry for 18 years. He has been with the Colorado Department of Transportation for 14 years and currently manages the department's Geohazards Program with a focus on geotechnical asset management, project delivery, slope characterization, emergency response, and slope stability design. Prior to CDOT he worked as a mine geologist in AngloGold Ashanti's open pit geotechnical program. Bob earned his Bachelor's degree in geology from Hamilton College and a Master's Degree in geotechnical engineering from the University of Colorado Denver.
