Grace Huang, Ph.D.

Grace completed her BASc in civil engineering at the University of Toronto, and her MSc and PhD in civil engineering with a geotechnical focus at Virginia Tech. She is currently a Geomechanics Product Manager at Rocscience responsible for the research and development of several 3D and 2D software packages for slope and underground stability. Grace has experience in geotechnical consulting in the transportation sector, software development, research, and teaching foundation engineering at the undergraduate and graduate levels.
