

Hunter Landry

Hunter is a member of Cajun Industries, LLC's Deep Foundations group, where he specializes in CFA and Drilled Displacement Piling techniques. He serves as the Field Construction Manager for these disciplines, bringing extensive technical expertise and hands-on field experience to the successful execution of large-scale industrial construction projects.

He holds a Bachelor of Science in Geological Engineering from the University of Mississippi, with a focus on geotechnical engineering.

Hunter is an active and long-standing member of the Associated Builders and Contractors (ABC) Young Professionals group and participates in multiple DFI committees. His involvement reflects a strong commitment to professional development, industry engagement, and leadership.
