

## **Hursit Ibuk, Dr.-Ing.**

Hursit Ibuk, Dr.-Ing., is the Head of Construction Materials and Product Sustainability at BAUER Spezialtiefbau GmbH, has been involved in the Deep Foundation Industry for 15 years and in the structural engineering business for 25 years. Hursit obtained his diploma degree in Civil Engineering, and later his doctoral degree, from the Ruhr University Bochum, Germany. He is now heading Bauer's Construction Materials Group which assists projects worldwide. His area of responsibility extends to product sustainability.

Hursit, a seasoned technical expert, is deeply committed to advancing concrete technology and standardization, particularly focusing on durability and concrete standards. He actively contributes within the Technical Committee "Concrete Technology" and the Subcommittee "Durability of Concrete" of the German Committee for Reinforced Concrete (DAfStb). Moreover, Hursit shares his expertise with the German Institute for Standardization (DIN) as a member of the Standards Committee for "Concrete Technology". Additionally, he plays an active role in various working groups, where he promotes progress and innovation in foundation engineering.
