

## **William Haasz, EIT**

William Haasz, EIT, currently serves as the Innovation & Quality Manager at Menard USA, a design-build specialty contractor specializing in ground improvement. In his current role, William focuses on spearheading the adoption of new and sometimes, exciting digital innovations across various departments and workflows within the company. In many cases, these projects are instrumental in advancing Menard's global sustainability initiatives, encompassing the implementation of new methods to reduce Menard's carbon footprint, as well as enhance the efficiency and accuracy of carbon footprint tracking in general.

In the decade that William has been with Menard, he has also significantly contributed to fostering an exemplary Safety and Quality culture for the company. In his most previous role, he served as the HSEQ Manager, as well as in roles such as Field Engineering Manager and Quality Manager earlier in his career. William has authored one paper with DFI and actively participates as a reviewer for numerous papers and presentations. William also serves as a member of the DFI Sustainability Committee and the joint DFI and G-I Sustainability Committee. He holds a Bachelor of Science in Civil Engineering from Drexel University and is preparing to sit for the PE exam this Fall.
