

## **Jamie Schick, PG, CEG, LEG**

Jamie Schick is a principal engineering geologist in Delve Underground's Bend, Oregon, office. Jamie has 27 years of experience in the practical application of the geological sciences in both large- and small-scale engineering, permitting, and environmental projects for the public and private sectors. He has expertise in detailed site characterizations as well as broad general surveys for projects involving landslides, tunnels, unstable rockslides, dams, transportation, pipelines, industrial facilities, and power generation sites. He is the lead engineering geologist and project manager for the Arizona Inn Landslide Mitigation Project. Mr. Schick holds geology degrees from the University of Oregon (MS) and Middlebury College (BA).
