

Bob Stier

In 2018 Bob Stier joined Drill Tech Drilling & Shoring, Inc (DTDS) and brought with him with over 35 years of tunneling and underground experience, to oversee Drill Tech's Eastern Region. In the six years Bob has been a part of DTDS he helped procure tunnel projects on both the West Coast and Eastern United States and has procured and managed Drill Techs first foundation projects in the eastern region. Under his guidance Drill Tech procured their largest GC Design-Build Contract for National Parks Service and successfully managed the project.

Prior to joining DTDS Bob worked as Area Manager for various Tunnel Construction Companies. Bob has overseen a number of tunneling operations including Conventional Drill-and-Blast tunnels, Roadheader, Pressurized Face TBM's, and Hard Rock TBM's and microtunnel projects. Bob has both direct field supervision and project management experience on major underground projects across the nation. Starting his underground career as a laborer on the first hard rock TBM project in Southeast in 1980 he quickly moved to field engineer. While attending college Bob also worked full time to pay for his education. During that time, he worked as a construction laborer, and construction foreman. Upon graduating college, he held positions as project engineer, project manager, superintendent, chief estimator, general manager, and area manager.

Bob graduated in 1986 from Southern Polytechnic State University (Kennesaw State) in Marietta, GA with a Bachelor of Science
